## ABOUT *MEDACCESS*

---

We live in a golden age of medical science. But over two billion people can't access the medicines they need, causing preventable illness, disease and death.

MedAccess is here to change that.

MedAccess is a social enterprise committed to improving health in more than 90 countries. Their mission is to cut illness and death by speeding up access to lifesaving vaccines, medicines, diagnostics and technologies for people in underserved communities.

They broker and finance agreements – which otherwise wouldn't be made – to bring medical innovations to more people, in more countries, as quickly as possible. In their first five years they have helped to accelerate access to products to tackle HIV, malaria, tuberculosis, syphilis and COVID-19.

They bring financial rigour and commercial acumen to address some of the most pressing global health needs. Using \$200 million capital from British International Investment, their team of global health and investment experts shape agreements that lower prices and secure supply of medical products.

They are doers with big dreams, busy trying to change the world. Their team is purpose-driven, inspiring, and innovative. They start from where partners are and work together to get where they need to be. But they're not afraid to go against the grain — in fact, they pride themselves on their honest and original approach and unconventional thinking.

MedAccess is independent and not-for-profit, with any operating surpluses invested into developing new agreements to accelerate access to healthcare.

## FURTHER INFORMATION ABOUT *MEDACCESS*
